### LETTER OF APPRECIATION.

I'd like to extend my profound gratitude to the development team **OptimalGroup** for their exceptional work on the Axiom Brewery website.

Right from the onset, the team exhibited an impressive level of professionalism and adeptness in web development. They worked meticulously to transfer our site to a new CMS, 1C-Bitrix, a task which they executed flawlessly and without any significant hitches. This transition was instrumental in improving our website's overall functionality and usability.

One of the standout achievements of the team was the creation of a Czech language version of our site. This development transformed our website into a multilingual platform, significantly broadening our reach and making our content accessible to a larger audience.

The design of the site is modern and engaging, and it brilliantly reflects the ethos of Axiom Brewery. We were particularly pleased with the dedicated section showcasing our range of beers. The detailed descriptions and high-quality images give visitors a comprehensive understanding of our offerings.

In terms of ongoing support and development, the team has been unfailingly committed. They are consistently reachable, promptly addressing any technical issues that arise. Their dedication to the continuous development of the project is noteworthy and much appreciated.

In conclusion, we are tremendously satisfied with the services rendered by the development team. Their efforts have greatly enhanced our website's performance and reach. We wholeheartedly recommend them as a reliable partner for web development and ongoing site support.

Best regards

**AXIOM BREWERY**
